Custom Formulation Request Form

2

Here are a few custom matching details to help you understand the process.

- We will match the color **AND** the sheen/finish/gloss level of your sample.
- There is an initial matching fee of \$175 per color, but we would waive the initial matching fee on an opening order of \$600 or more (per color).
 - \$200 formulation fee for metallic color match
- Some products have price breaks so the unit prices depend on the type and quantity you would like.
- The lead time on the initial order can take up to 2 weeks (depending on our order backlog and color difficulty), but if your need is urgent then let us know and we will do our best to accommodate your timeline.
- Reorders typically ship in 2-3 business days and can vary a day or two on either end depending on the order size and our production backlog. There is no minimum order or matching fee required on reorders.

All samples should be sent to:

**MyPerfectColor
65 Brown Ave
Springfield, NJ, 07081**

Samples/reference area should be no smaller than...

**1 inch by 1 inch square (actual size)
The bigger and cleaner your sample the more accurate the match!**

When your sample is received we will reach out to you by email.

You may forward any questions to support@myperfectcolor.com or call us Monday-Friday 9am-6pm EST.

Thank you!
